

# 10 Million Cycles and “No Wear” prompted a valued customer to say:

*“We were so impressed with both the performance and benefits of the Extreme Interlocks we decided in ‘08 to retro-fit all our existing tools and make them a standard on all new tooling. Cycle counts of “8 Million” shots and still going with “No Wear.” Mold set-up times were reduced from 2 hours to 30 minutes and a significant documented reduction in repair just because of this simple product. It wasn’t a hard decision to make.”*

**Robert Smucker**  
Tooling Engineer  
Alcon Corporation  
Atlanta, GA

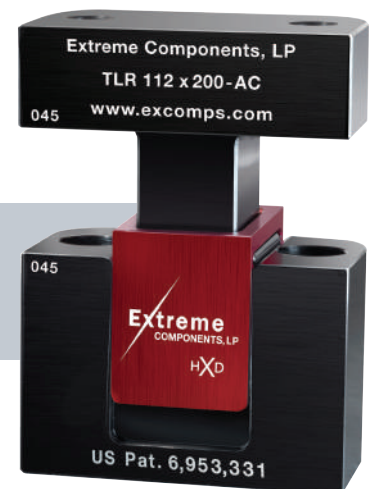

AT RIGHT: an actual  
10,000,000 cycle  
interlock lock  
used by the Alcon  
Corporation

**You can always depend on the patented performance of Extreme Components, LP Top Locks:**

1. The ONLY lock in the world to offer a “Lifetime Guarantee” against wear
2. Ultra precise CNC manufacturing allows for exact locating of molds every cycle
3. Makes thin wall molding more accurate and predictable than any other device on the market
4. Provides maximum protection for your intricate shut-offs and parting lines

**The #1 Performing  
Lock in the World**
